I put the time of the last analyze just at the top of the graph.

On the graph I voluntary centered the last value to link it with the centered value at the top. And for me it's more easier to compare the current value with the value from yesterday because they are near.

I propose to link all dots behind them to have something less rough, more esthetic and modern.

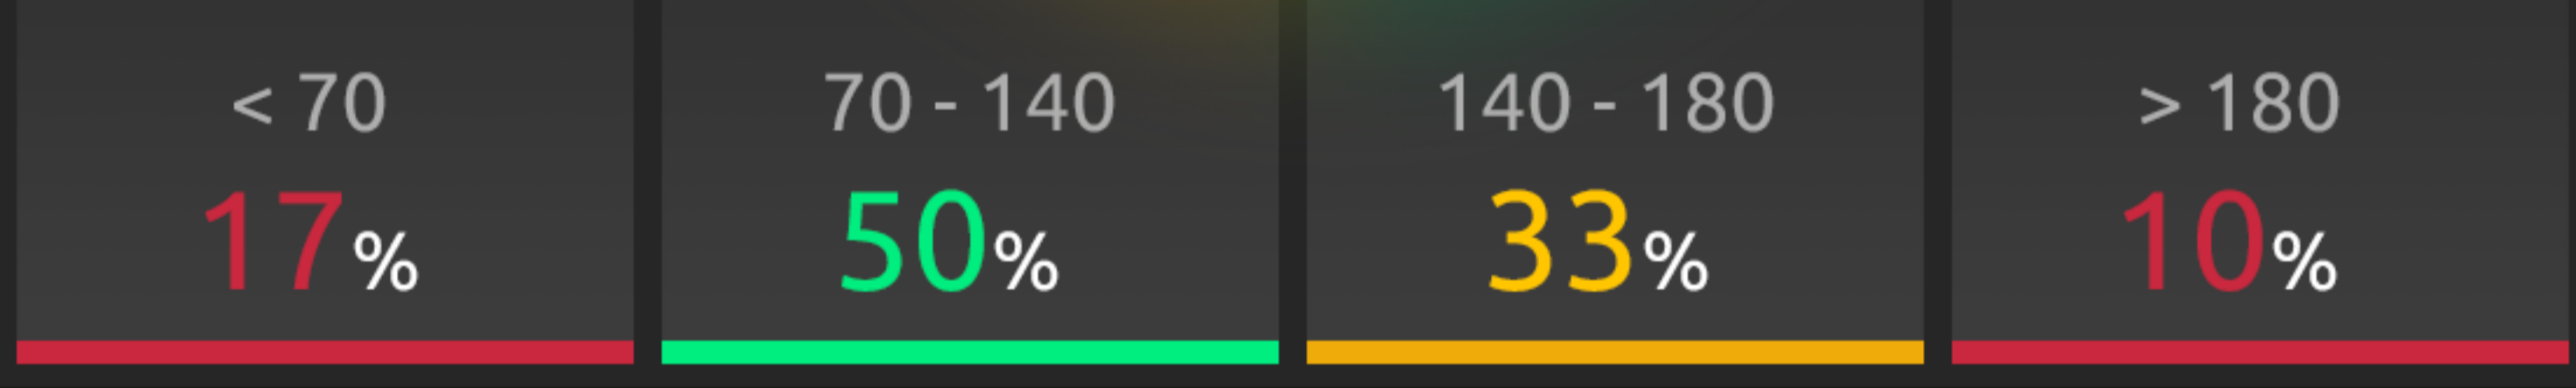

Ven. 20:45:06: SGV 122 at 20:50:06 Pump: +53sec  
 Ven. 20:43:06: Next poll due at 20:45:06  
 Ven. 20:42:54: Connection to Contour Next Link  
 Ven. 20:40:16: **! Could not communication with the pump. Is it nearby?**  
 Ven. 20:39:06: Next poll due at 20:45:54

Average of the last 24h

Ven. 20:45:06: SGV 122 at 20:50:06 Pump: +53sec  
 Ven. 20:43:06: Next poll due at 20:45:06  
 Ven. 20:42:54: Connection to Contour Next Link  
 Ven. 20:40:16: **! Could not communication with the pump. Is it nearby?**  
 Ven. 20:39:06: Next poll due at 20:45:54

I suggest you this second screen. For me it will be available if you slide the graph from right to the left. I think it should not asking you a lot of dev because you have all these informations. I think it could be interesting to have the average of the last 24h. What do you think about it ?
